

Brand new Lockout/Tagout training video has never before seen footage and updated standards

Have you been waiting to update that lockout/tagout training video? Now just might be the time.

Marcom has just released it's brand new lockout/tagout safety training video with never before seen film footage and thorough information regarding the importance of lockout/tagout training.

Lockout/tagout continues to stand at number 5 of OSHA's top 10 most violated safety standards and is still responsible for far too many grisly deaths each year; particularly in the manufacturing sector.

OSHA's standard regarding lockout/tagout states that:

"This standard covers the servicing and maintenance of machines and equipment in which the unexpected energization or start up of the machines or equipment, or release of stored energy, could harm employees. This standard establishes minimum performance requirements for the control of such hazardous energy." ([29 CFR 1910.147](#)).

It is absolutely imperative that supervisors, managers, company owners, etc. have implemented a specific lockout/tagout program for their operation. This is an unbelievably preventative tragedy that happens far too often due to cutting corners, costs, or negligence. In regards to a lockout/tagout program, OSHA states:

"The employer shall establish a program consisting of energy

control procedures, employee training and periodic inspections to ensure that before any employee performs any servicing or maintenance on a machine or equipment where the unexpected energizing, startup or release of stored energy could occur and cause injury, the machine or equipment shall be isolated from the energy source and rendered inoperative.”([1910.147\(c\)\(1\)](#))

This particular lockout/tagout safety training video comes in a variety of training options, including [online safety video streaming](#) (kind of like Netflix), [online interactive training courses](#), [digital licensing](#) for companies with their own existing Learning Management Systems (LMS) and the [classic DVD format](#).
